Applicant TECHNOLOGY INNOVATION LIMITE	D ET AL.		

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

INTERNATIONAL PRELIMINARY International application No. PCT/GB03/01004 EXAMINATION REPORT - SEPARATE SHEET

Section V.

- 1. The closest prior art is represented by document WO-A-98/26828 (cited at page 1). The subject-matter of claim 1 differs from that teaching (and the teaching of any of US-A-4 860 740, US-A-5 873 360, EP-A-1 172 122 and EP-A-0 525 720) in that:
 - a part of the wall of the chamber is formed as a deformable enclosure within which the container is received such that the at least one dispensing aperture is sealed and from which the container can be introduced into the chamber by pressure applied to the external surface of the deformable enclosure, the system being arranged such that when the container is introduced into the chamber the container is held stationary.
- 1.1 None of the available prior art documents discloses a deformable enclosure of the device chamber providing a seal of the container in the non usage status and which allows for the container to be stationary introduced into the chamber.
- 1.2 Such a device is an alternative solution to the known devices which provides for easy operation and a possible less audible powder administration in comparison with the devices having rotational capsules. The advantage of that the container is held stationary within the chamber minimizes the risk of powder loss due to device shaking.
- 1.3 Claim 1 therefore fulfils the requirements of Article 33(2)-(3) PCT.
- 2. Claims 2-20 are dependent claims defining preferred embodiments of the system of claim 1.
- 3. Claims 1-20 therefore fulfil the requirements of Article 33(2)-(4) PCT.
